

Please do anything and everything you can to limit any type of restrictions that the Federal Government or the FCC are attempting to put on the satellite radio industry. I am an owner and supporter of satellite radio service. As a paying member I appreciate how they have catered to the listeners needs unlike the mass media outlets. I feel as though satellite radio has been a blessing to my tastes and it offers great convenience for many of the things I need to know of daily (News, Weather, and Traffic).
